> Kızılırmak Delta, Samsun · a spring Saturday, early morning

Hello from Samsun! My mum is a wildlife photographer, and this spring she is filming **birds** at the Kızılırmak Delta for her nature documentary. It's a long weekend, so Dad, Nil and I are here with her. Fıstık is at home in Antalya with Grandpa. Dogs can scare birds, so he must stay at home.

Where is the delta? It is on the Black Sea **coast**. Here, the Kızılırmak **river** meets the sea. The Kızılırmak is the longest river that starts and ends in Türkiye! The delta is a **wetland**, with water, tall **grass** and reeds everywhere. It's a perfect **habitat** for birds.

Birds are busy early in the morning, so we must get up at six. Nil is very grumpy. "I'm not a bird. Why must I get up early?" she says. We must be quiet, and we mustn't walk off the path.

Dad gives me his **binoculars**. I can see a grey **heron**. It's standing in the water on its long legs. It's taller than a duck and much quieter than Dad!

Then I see a big black rock in the water. But the rock opens its eyes! It isn't a rock. It's a **water buffalo**! "Water buffaloes live here too. They love mud," Mum says. "Can I go closer?" I ask. "No way!" says Nil. "Don't forget, **curiosity** killed the cat!"

Now I'm drawing the heron in my notebook, and Nil is sleeping in the car. Who is the sleepiest animal in the delta? Nil, of course!

Ada, the delta detective

Animal Champions

Linked to: Student's Book pp. 120, 122 and 124 – "Animal Habitats", "Penguins" and the wild animals poster project

BEFORE YOU READ Which animal is the fastest? Which one is the biggest? Guess!

> 5-A Science & English Project · "Animal Champions" · a poster by Ada Aksoy

Back in Antalya, Ms Arslan gives us a project: a poster about wild animals. After our weekend at the delta, I have got a great idea: animal champions! Which animal is the fastest, the biggest or the tallest? Read and find out.

The fastest: the **cheetah**. The cheetah is the fastest land animal. Most cheetahs live in the **savanna** in Africa. A cheetah can run very fast, but only for a short time. Its long **tail** helps it turn quickly.

The biggest: the blue **whale**. The blue whale is the biggest animal on Earth. It is longer than a bus! It lives in the **ocean**, but it isn't a fish. It's a **mammal**, so it must come up to breathe air.

The tallest: the **giraffe**. The giraffe is the tallest animal in the world. With its long neck, it can eat leaves from the tops of tall trees.

The biggest on land: the African **elephant**. It has got **enormous** ears. An elephant is heavier than a car!

Fun fact box – penguins! **Penguins** are **birds**, but they can't fly. They are great swimmers, and they use their **flippers** to swim. On land, they **waddle**. Where do penguins live? Most penguins live in the southern half of the world. The emperor penguin is the biggest penguin.

Ms Arslan loves my poster. And Ozan says, "I'm a champion too. I'm the fastest eater in 5-A!"

Ada Aksoy, 5-A

Let's check!

My score: _____ / 17

1 Where do most cheetahs live?
(a) in the jungle (b) in the savanna in Africa (c) in the mountains

2 Why must a blue whale come up?
(a) to breathe air (b) to eat leaves (c) to sleep on the ice

3 Which animal is the biggest on land?
(a) the giraffe (b) the African elephant (c) the blue whale

4 How do penguins move on land?
(a) They fly. (b) They waddle. (c) They climb.

2 Answer the questions Write short answers.

a What type of animal is the blue whale?

b How can a giraffe eat leaves from the tops of tall trees?
